IMPORTANT:

Please include your name, address and phone number with your batteries.

Anonymous batteries will be delayed until we can identify the owner, this is normally when the sender contacts us wondering what happened to them!

Please package your batteries securely to avoid damage in transit, as we cannot be held responsible for this.

Please send batteries using a traceable service, such as Recorded Delivery or a Courier to help avoid items going missing on route.

For large or heavy consignments (over 1kg) we would recommend booking a courier collection through the agent **www.parcel2go.com**. We use them, they are competitively priced and have options from all the major carriers.
